

Claims

1. A sustained-release preparation which comprises a drug and a bioabsorbable polymer hydrogel, wherein a concentration gradient of the drug is formed in the hydrogel.
2. The sustained-release preparation according to claim 1 wherein the hydrogel is a gelatin hydrogel.
3. A method of sustained release of a drug *in vivo* using a sustained-release preparation which comprises a drug and a bioabsorbable polymer hydrogel, wherein a concentration gradient of the drug is formed in the hydrogel.
